course, they will also work with Nikon DX cameras, subject to the normal 1.5X “crop factor” that is well-known to DX photographers.

Using Manual Focus Lenses on Nikon DSLR Cameras

Manual focus is best for this, as you have complete control of where you place of the focal point. Start at either the front of the image or the back, and move through the frame. You can leave out a distracting or unattractive background. After you have taken the images, you need to review them to ensure a sharp focus throughout.

Why Use Manual Focus? | How to Manually Focus Your Camera

Manual focus is performed on DSLRs in much the same way as it was on film bodies – through a simple rotation of a lens’s focusing ring. Today this can be controlled with far greater accuracy than before, although the design of today’s DSLRs presents a few problems.
