With an understanding of the JCA classes, consider how these classes might be combined to implement an advanced network protocol like SSL/TLS. The SSL/TLS Overview section in the JSSE Reference Guide describes at a high level how the protocols work. As asymmetric (public key) cipher operations are much slower than symmetric operations (secret ...

More details, please refer to the "OCSP Stapling and Certificate Revocation" section in the "Java Secure Socket Extension (JSSE) Reference Guide" documentation. Note that TLS 1.3 deprecate the "status_request_v2" extension, and therefore deprecate the OCSP stapling implementation based on the "status_request_v2" extension.
