The setup of the drilling rig consists of a custom-made drill bit and check-valve attached to one end of a 1¼" galvanized pipe and a spout attached to the opposite end. Using manual power and a rope and pulley system, the stem is continually lifted and dropped into the borehole. The repeated downward force of the rig into the borehole causes sediment and rocks to loosen. Water is poured into ...

#### SIMPLE AND LOW COST MANUAL WATER WELL DRILLING

In addition to having good fashion sense, Drill Rig Operators also need to work well with others. You start each job by talking with your customer, Drill Foreman, and any other workers on the job. You figure out what exactly needs to be done (and where), and then decide how to go about the task. You maneuver the drill into place, check to make sure the correct specifications (like depth and width) are entered, and then get to work making the hole.
