### Seat Car Warning Lights Guide - Diagnostic World

I called my local Seat dealer and have it booked in for next Tuesday to let them have a look. The workshop chap I spoke to said that if it's driving OK it should be fine to carry on using it as it's probably just a faulty sensor. The car's only done 5.8k miles so it's a bit of a shock to see a warning light.

### 'Orange Engine' warning light | SEATCupra.net Forums

While out driving yesterday the light on the dash which corresponds to the exhaust emissions warning lamp came on and has stayed on. In the handbook it states: "Any faults in the engine management system which occur while driving will be indicated by a flashing warning lamp" However, the light was no flashing and stayed on all the time.

## **SEAT Engine Management Warning Light Need To Diagnose**

The warning lamp should light up for a few seconds when the ignition is switched on. It should go out when the engine has started running. If the battery is disconnected, the indicator remains lit, even with the engine running. The warning light only goes off after a distance of approx. 50 m.

## **Seat Leon >> Coolant Level\* / temperature :: Warning lamps ...**

If the engine isn't able to burn the soot due to a short trip, the computer will then turn on the filter warning light to warn the driver that the soot level is building up. When you first see the light, you can resume normal driving, but when you get a chance, take the car onto the highway and drive it for around 10 minutes at 40+ MPH.

## **What Does the Diesel Particulate Filter Warning Light Mean ...**

The warning comes when the engine is started and disappears soon after that. Somebody told me that this is down to the cold weather and it's just a reminder to ensure the antifreeze coolant is in the tank which must be anyway. I'll try to get the dealer on the phone to confirm.

## **Check Coolant Level Warning - Sensor Problem? - Seat Ateca ...**

The engine management light is a warning for an abundance of issues. In a worst case scenario, the light will come on and the car will lack power, this means that there is a severe issue and the car has gone into safe or 'limp' mode.
